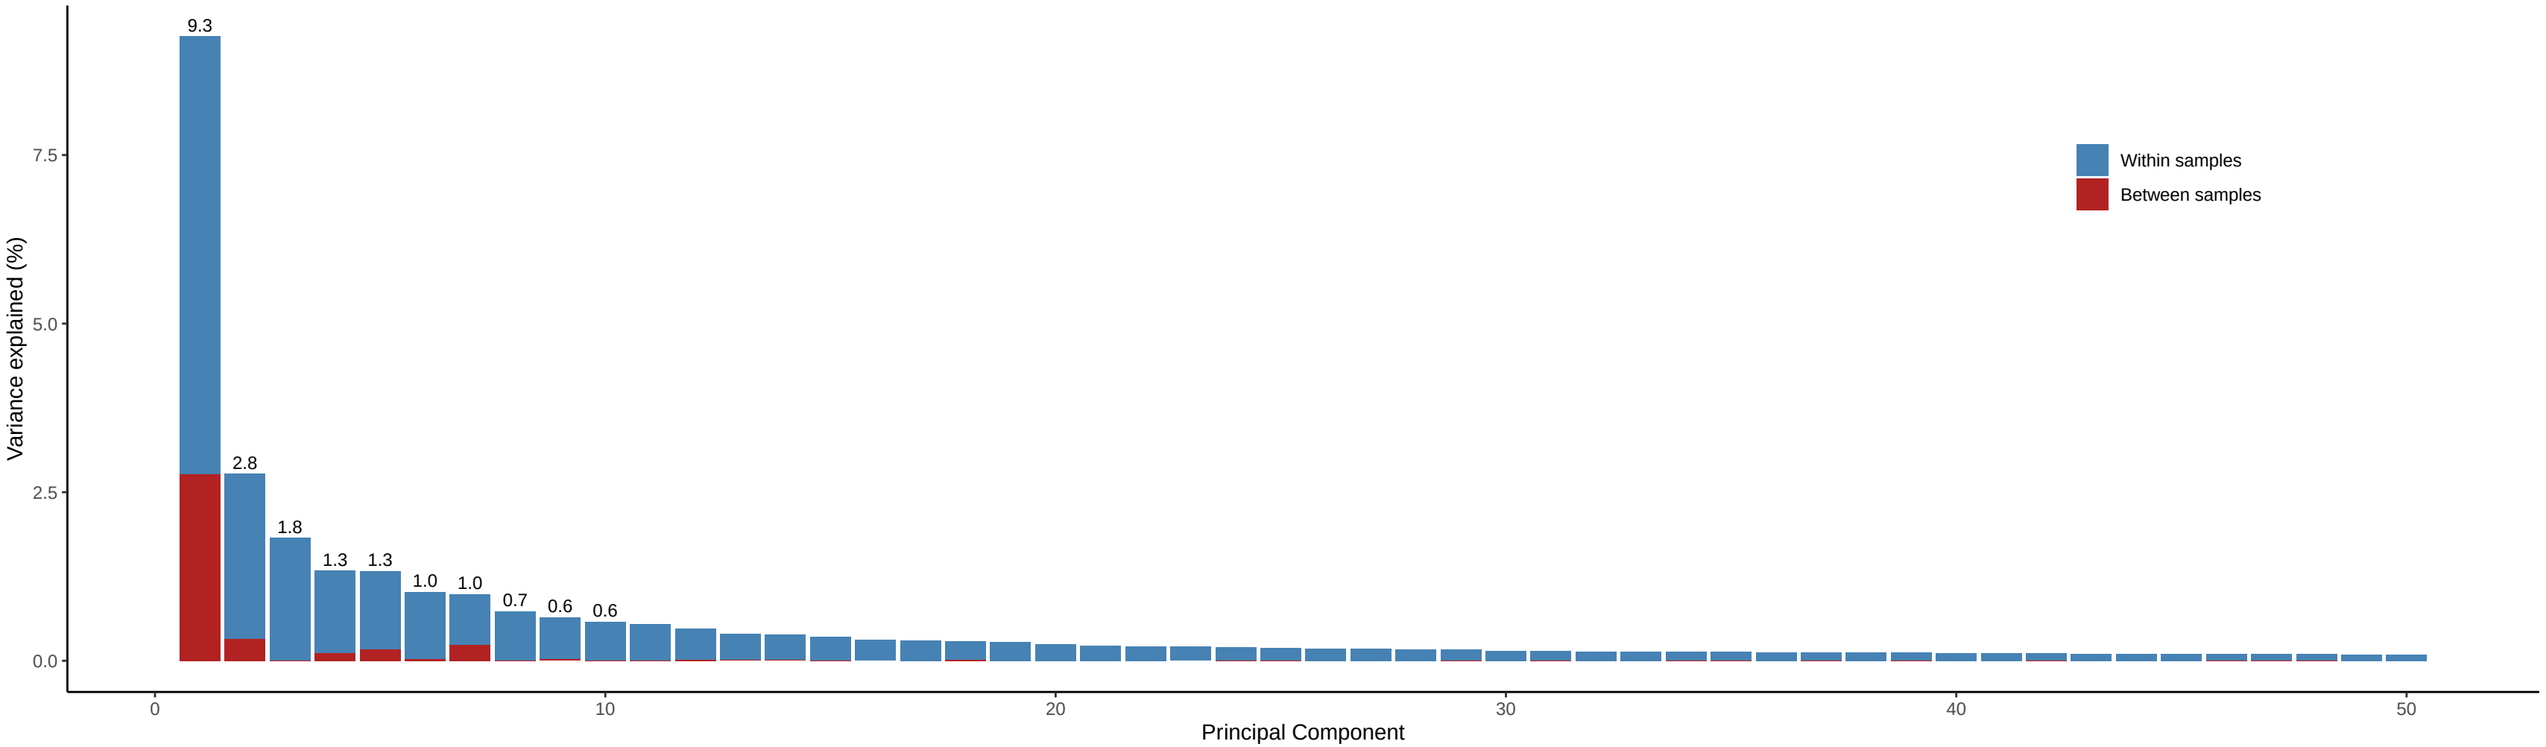
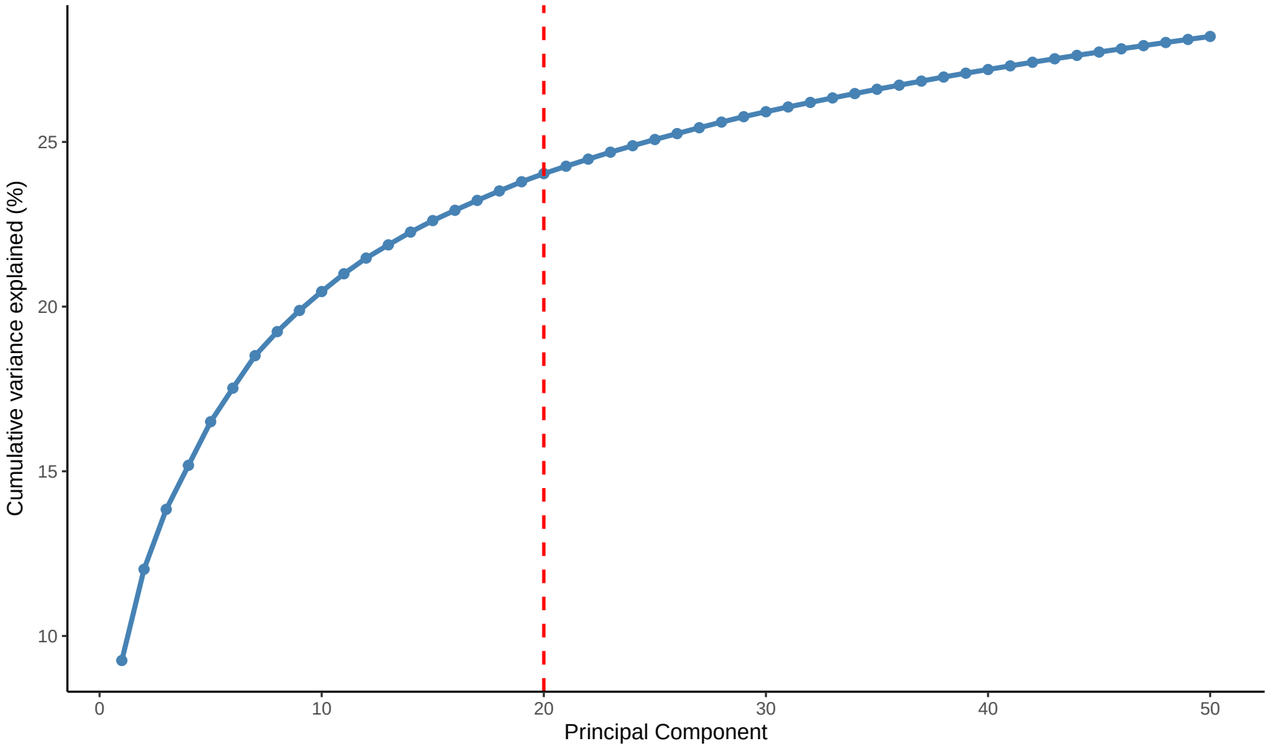
Variance explained by each PC

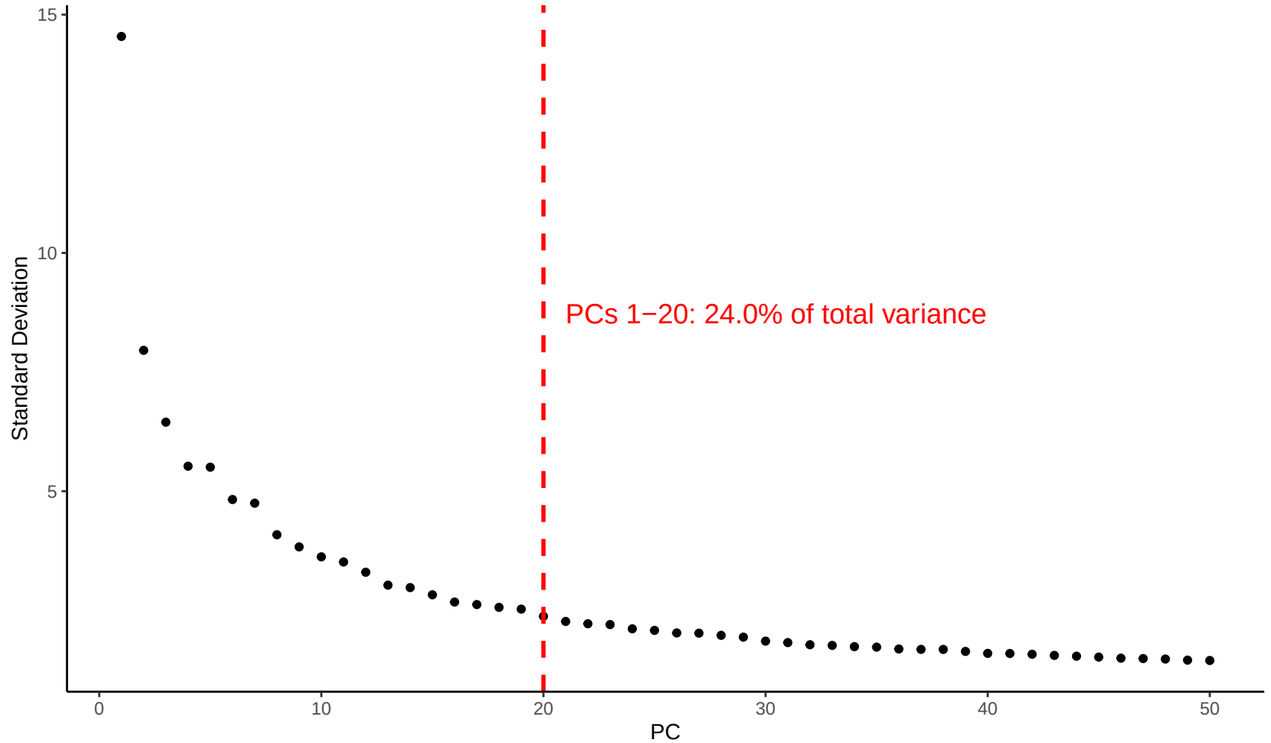
% of the total variance of the 3,000 scaled variable features (LogNormalize)
Red: part of each PC explained by sample (PC ~ Sample), R^2 x PC variance



Cumulative variance explained

PCs 1−20: 24.0% | PCs 1−50: 28.2%



Elbow Plot: Standard Deviation by PC


PCs 1−20: 24.0% of total variance (85.2% of the variance in all 50 PCs)
